## About NASSGAP and this Report

The National Association of State Student Grant and Aid Programs (NASSGAP) is dedicated to the promotion, strengthening, encouragement, and enhancement of high standards in the administration and operation of student grant and aid programs, in order that these programs be available to students in all states to expand and further their postsecondary educational opportunities.

NASSGAP serves as a forum for the development and exchange of information, ideas, policy positions, procedures, and needs for student financial assistance for the benefit of member agencies and other organizations. NASSGAP also acts as a collective voice of reasoned opinion before state, regional, and national councils with respect to student financial aid programs.

NASSGAP conducts research, publishes reports, holds conferences, and otherwise engages in activities which help existing student aid programs to become more responsive to federal, regional, and state public policy goals and objectives.

Each year, NASSGAP completes a survey regarding state-funded expenditures for postsecondary student financial aid. This report, the 42nd annual survey, represents data from academic year 2010-11. Please note row and column data in the tables may not add to row and column table totals throughout the report due to rounding.

Comments, suggestions, or questions concerning this report may be directed to NASSGAP at 202.721.1186 or [nassgapsurvey@nassgap.org](mailto:nassgapsurvey@nassgap.org).

## Electronic Resources

NASSGAP's Web site is [www.nassgap.org](http://www.nassgap.org). The site has many elements of interest to student aid policymakers and researchers including position papers and an online library ([www.nassgap.org/Library](http://www.nassgap.org/Library)) of student aid research. Electronic copies of this report, and reports from several previous years, are available in PDF format free of charge at the site.

An online query tool that will allow for customized queries of survey data is available at: [www.nassgap.org/customquery](http://www.nassgap.org/customquery).

A State Data Quick Check tool which shows expenditures by programs for a selected year is available at: [www.nassgap.org/survey/state\\_data\\_check.asp](http://www.nassgap.org/survey/state_data_check.asp).

A PDF version of the this year's survey instrument is available at: [www.nassgap.org/survey/NASSGAP\\_Survey\\_Instrument\\_2010-11.pdf](http://www.nassgap.org/survey/NASSGAP_Survey_Instrument_2010-11.pdf).

An explanation of the terms used in the survey and a copy of the survey instrument are available on the NASSGAP web site.

# Executive Summary

“Never in the history of this country have so many young people sought the ‘open door’ of college for self fulfillment and preparation for a better future. Never in our history has the cost involved in implementing their decisions been higher. Individual and public interest is involved in every decision made concerning higher education. The issues are public policy and both federal and state government are involved. The challenge and goal of our system of higher education is to be able to demonstrate by word and practice that no young American who qualifies and seeks higher education shall be denied the right to attend an appropriate post secondary educational choice simply because s/he lacks the dollars to make the decision a reality.”

Dr. Joseph D. Boyd, NASSGAP  
August 15, 1969

This report provides data regarding state-funded expenditures for student financial aid and illustrates the extent of efforts made by the states to assist postsecondary students. Information in this report is based on academic year 2010-11 data from the 42nd Annual National Association of State Student Grant and Aid Programs (NASSGAP) survey.

## Data Highlights

- In the 2010-11 academic year, the states awarded about \$11 billion in total state funded student financial aid, an increase of about 2.5 percent in nominal terms and 1.3 percent in constant dollar terms from the \$10.8 billion in aid awarded in 2009-10.
- The majority of state aid remains in the form of grants. In 2010-11, almost 4.3 million grant awards were made representing about \$9.2 billion in need and nonneed-based grant aid, an increase of about 4 percent from the \$8.9 billion in grants awarded in 2009-10. Of the grant money awarded in 2010-11, 71 percent was need-based and 29 percent was nonneed-based, a slight increase in the percentage of nonneed-based aid.
- Funding for undergraduate need-based grant aid increased slightly nationwide from about \$6.3 billion in 2009-10 to about \$6.4 billion in 2010-11, an increase of 1.7 percent.
- Ten states (California, New York, Texas, Illinois, Pennsylvania, New Jersey, North Carolina, Indiana, Washington, and Florida) collectively awarded more than \$4.8 billion in undergraduate need-based grant aid, accounting for about 75 percent of all aid of this type.
- States provided more than \$1.8 billion in nongrant student aid, including loans, loan assumptions, conditional grants, work-study, and tuition waivers, down almost 5 percent from last year. Loans and tuition waivers accounted for 74 percent of nongrant funds awarded.

All fifty states (plus Washington DC and Puerto Rico) reported state-funded undergraduate programs with a need component, of which 48 states had a program that was exclusively need-based. Twenty eight states identified undergraduate programs which made awards based only on merit. Exclusively need-based aid constituted 44 percent of all aid to undergraduates, exclusively merit-based aid accounted for 20 percent, with the rest, 36 percent, accounted for by other programs and by programs with both need and merit components. The amount of undergraduate aid awarded in 2010-11 through programs with a merit component increased to about \$3.9 billion from about \$3.4 billion in 2009-10. This compares to \$4.5 billion awarded to undergraduates through programs based only on need.

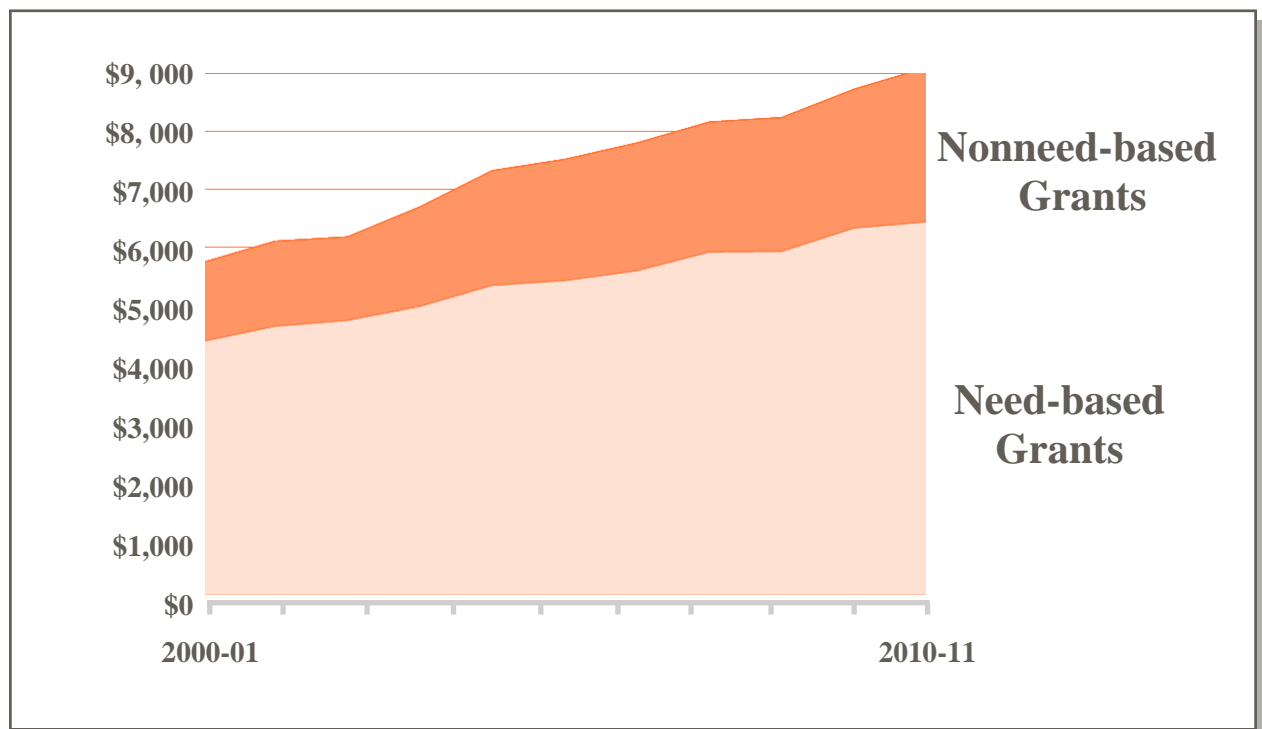

Georgia, South Carolina, Washington DC, and Tennessee provided the greatest amount of grant aid on a per capita basis. Georgia, South Carolina, West Virginia, and Tennessee were the largest providers of aid per capita for the population between ages 18 and 24. Georgia, South Carolina, and Tennessee provided the most undergraduate grant dollars compared to undergraduate full time equivalent enrollment. South Carolina, Georgia, Tennessee, Vermont, and West Virginia had the highest proportion of total expenditures for state-funded grants compared to State fiscal support for higher education.
