AGENDA ITEM 3. EXECUTIVE DIRECTOR'S REPORT

EXECUTIVE DIRECTOR'S REPORT

In the January Executive Director's report I noted my intention to engage staff throughout the agency in an initiative to evaluate and adapt our current financial assistance programs into an even better, more comprehensive array of options for Illinois families so that cost is not the only consideration when evaluating post-secondary options. To begin that process, and in keeping with one of the original charges of the agency, I organized an internal task force to develop the framework for a new alternative loan program that would not rely on traditional methods of assessing creditworthiness based on scores and collateral, but rather would rely on more academic predictive statistics. Students that have made it to their senior year in college are most likely to graduate. Students that graduate are less likely to default on their student loans. Students with a college education can expect to earn more than those without a degree. For the college senior struggling to finance the final year of college, degree completion, not an artificially low credit score due to lack of credit history, is more predictive of future financial stability. If we truly believe that post-secondary education is a valuable investment for families, then we must also demonstrate our belief that education is a valuable investment for the state of Illinois. To that end, the task force has returned a proposal that would offer loans to Illinois students attending Illinois colleges and who are in their final year of study. Eligibility for the program is based on academic future not credit history and includes incentives for our college-educated students to remain in Illinois and give back to the state that invested in their education. Borrowers would receive interest rate reductions for working in Illinois and be eligible for income contingent repayment options to ensure that talented students are not discouraged from pursuing much needed but traditionally lower-paying careers. This new "public" alternative to the for-profit private alternative loan industry is just one example of ISAC's renewed focus on providing comprehensive financial options to Illinois families.

Staff Appointments

I am very pleased to announce the addition of three key new individuals to ISAC's senior management team. As we celebrate our first 50 years of providing access to higher education and embark on our second 50 years of service to the citizens of Illinois, the agency is conducting a comprehensive self-evaluation and strategic review. This analysis is designed to help sharpen our focus on the efficient delivery of programs, products and services providing unique benefits to the people of Illinois. Each of the individuals joining us brings unique knowledge, experience and talents, as well as a great enthusiasm for the tasks at hand, that will help us successfully shape this ISAC of the future.

Kim Barker Lee has recently joined us as our General Counsel. Ms. Lee comes to ISAC from the law firm of Pugh, Jones, Johnson, and Quandt, where she was a Partner practicing in the areas of public finance, government relations and contracts. Her past legal experience includes serving as bond counsel and counsel to underwriters, borrowers, and issuers on a wide array of tax-exempt and taxable public finance transactions. Her previous legal practice has included transactions for the City of Chicago, Chicago Park District, Illinois Finance Authority, and other issuers in Illinois and in the Midwest. Ms. Lee received her BA from Yale College and Juris Doctorate from the New York University School of Law.

John Sinsheimer has joined us to assume the newly created role of Chief Financial Officer / Managing Director of Financial Products and Services. Initially, four key divisions will report to John – Business and Financial Services, Budget and Finance, IDAPP, and Program Services & Compliance. He comes to ISAC with a wealth of knowledge and experience in finance and higher education, having most recently served as the Associate Vice President of Finance for the Illinois Institute of Technology. Over his accomplished career, John has held several top finance executive positions with major corporations such as First Chicago, Dresdner Bank, Encyclopedia Britannica, the Federal Reserve Bank and Children's Memorial Hospital. Mr. Sinsheimer received his MBA from Northwestern University and his BA from Rice University in Houston, Texas.

And finally, we are pleased to welcome Katharine Gricevich as Special Assistant to the Executive Director. As the newest member of our government relations team, Katharine brings a keen grasp of the legislative process and Illinois higher education acquired over the past four years during which she served as a member of the Senate Democratic staff, specializing in education issues. She previously worked for the UN's International Criminal Tribunal for the former Yugoslavia. Ms. Gricevich received her BA from Beloit College in Beloit Wisconsin.

We are tremendously excited about the addition of these key members to our staff at this critical time, and look forward to their valuable contributions in helping to shape ISAC's future.

ISAC - Celebrating 50 Years

In this year of our 50th anniversary, it is only fitting to take a trip back in time and revisit ISAC, circa 1957. The retrospective begins with the focus on our flagship program, the Monetary Award Program or as it's commonly known, MAP. Perhaps few are aware that what is today known as MAP is actually the vehicle which launched the Illinois State Scholarship Commission.

On June 21, 1957, House Bill 380, establishing the Illinois State Scholarship Commission was signed. The purpose of the Commission was to administer a program that would "conserve the resource of talent vital to the welfare of the state and nation by assisting and encouraging youth in obtaining a college education." At the time, the Commission was to be comprised of seven members; 3 professionally associated with education and 4 lay citizens noted for their interest in education, all appointed by the governor.

As required by what was then the Illinois State Scholarship Program, an examination was administered as a means to determine the "applicant's superior capacity to profit by a higher education." In the first year of testing, 13,522 applicants took the Illinois State Scholarship Examination, which was administered on the campuses of 70 Illinois colleges and universities on February 1, 1958. Separate tests of English usage, mathematics, social studies, reading, natural sciences reading and word usage made up the test, specifically designed for this purpose.

A secondary consideration for eligibility was financial need on the part of the applicant. Because "it is assumed first that parents have a primary obligation to maintain a dependent child and this obligation does not lessen at the time the child enrolls in college," the College Scholarship Service was called upon to provide a method for determining the amount the family would contribute toward a college education. If all this sounds familiar, it's because today, some 50 years later, the process remains remarkably similar.

In the first year of awards - 1958 - 2,160 scholarships were awarded; 1,502 were monetary awards and 658 were honorary. (If an applicant met all eligibility criteria except

financial need, the award would be classified as honorary.) The distinction of the two different categories paved the way for today's MAP and Illinois State Scholar Programs. With comparatively humble funding of \$600,000, the average "stipend" amount was \$400 that first year.

Putting a human face on the data, the Illinois State Scholarship Commission's *Report* of that year tells us that sixty percent of recipients were male and 40 percent female. Three-fifths of the monetary awards were for attendance at private universities, while less than half of the honorary recipients planned to attend private institutions. According to the *Report*, "Choosing to attend a state institution (whose costs are low) made it more difficult for an applicant to demonstrate need and therefore increased the likelihood of his award being honorary."

First-year awardees indicated majors in science, mathematics and engineering, fields in which nearly 50 percent of recipients were studying. The occupational background from which the winners came was widely varied and suggested to researchers that "a great percentage of talented youth may be entering college from some cultural areas than had previously been the case."

And now, 50 years later, with an annual budget of nearly \$385 million and expected to provide awards for more than 145,000 college students this year, the evolution of what was then the Illinois State Scholarship Program into the Monetary Award Program has created one of the largest need-based grant programs in the nation. As expressed by high school guidance personnel in that first report, and as remains true a half-century later, the Illinois Student Assistance Commission and its efforts provide the opportunity of college to "students who previously could not entertain this prospect for financial reasons."

ISAC Participates in 2007 ILASFAA Conference

ISAC staff joined financial aid administrators from around the state at the recently-held Illinois Association of Student Financial Aid Administrators, Inc. (ILASFAA) 2007 annual conference. The theme of this year's conference was "Exploring Our Professional Future." Embracing this theme in the State Update address, I gave attendees an overview of ISAC's future and thanked them for their critical support and partnership toward all that has been accomplished in the past and expressed how important our partnership is for all that is hoped to be accomplished for Illinois students in the future.

Each year the conference is one of education and professional development. To that end, ISAC staff contributed as presenters for sessions about the Basics of EFC Calculation, Electronic Tools - Search Engines and Project Management Essentials - What Is a Project and How to Successfully Manage One. In addition, staff presented a repeated session with important information on the administration and operations of ISAC-administered programs.

Finally, since ISAC is commemorating three milestone anniversaries in 2007 – 50 years for ISAC, 30 years for the IDAPP and 10 years for *College Illinois!* prepaid tuition program – an anniversary reception was held at the conference. This event provided an opportunity to celebrate accomplishments that would not have been possible without our partnership with the Illinois financial aid community.

Legislative Update

The 95th General Assembly is in full swing and at least 15 bills have been introduced affecting ISAC. We have testified before several Senate and House committees on a range of topics, including our budget and the partial sale of the student loan portfolio.

On March 7, 2007, Governor Rod Blagojevich delivered his FY2008 budget address, which included a 1.9 percent increase for our Monetary Award Program, as well as funding for the Nurse Educator Loan Repayment Program.

The legislation impacting ISAC can be viewed on CollegeZone. A few bills we are actively supporting are highlighted below:

SB 519 – The "College Savings Employer Participation Initiative of 2007". This bill encourages employers to match employee contributions to college savings programs, such as *College Illinois!*. It creates an income tax credit for employers, which would be 25% of the matching donation, not to exceed \$500 per employee per year.

State Treasurer Alexi Giannoulias – whose office administers the *Bright Start* college savings plan – has joined ISAC in promoting SB 519. This bill is an exciting new partnership with employers and will enable *College Illinois!* participants to see their savings grow more quickly.

SB 1455 – This bill requires ISAC to implement and administer a revolving loan program to provide nominal interest loans to cover the costs of attending a public or private institution of higher education. It provides that the loans must be made to students who maintain a "B" average and may not exceed \$5,000 per person per academic year. To be eligible, students need not be U.S. citizens, but they must meet residency criteria including attending an Illinois high school for at least three years, living in Illinois with a parent or guardian during high school, and signing an affidavit stating that the individual will apply for permanent resident status at the earliest opportunity.

HB 703 - The maximum MAP award a student may receive has been set by statute at \$4,968 for six years. During that time, however, the average tuition has increased 45 percent, leaving a growing gap. Further, under the current formula, a simple increase in the maximum award does not help community college students.

HB 703 is the result of a compromise amendment forged by Rep. David Miller, who Chairs the House Higher Education Appropriations Committee, between advocates for students attending Illinois' private schools and those attending community colleges. The bill not only increases the statutory maximum by 10 percent to \$5,466, but also improves the formula by linking the percentage increase in the maximum MAP award to an identical percentage increase in the award to students whose awards are capped by tuition, primarily community college students, many of whom are women with small children.

The bill has the support of the Illinois Board of Higher Education, Illinois Community College Board, Women Employed, and the Federation of Independent Illinois Colleges and Universities (FIICU). If fully funded, the change would cost \$49 million.

HB 376 provides that distributions (i.e., benefit payments) to Illinois residents who invest in out-of-state Section 529 college savings programs are *exempt* from Illinois state income tax, just as is

already the case for Illinois Section 529 college savings programs, such as the *College Illinois!* prepaid tuition program, administered by ISAC, and the Bright Start and Bright Directions 529 savings programs administered by the Illinois Office of the Treasurer. *College Illinois!*, Bright Start and Bright Directions retain the Illinois tax *deduction* for contributions toward purchase of those in-state prepaid tuition contracts or college savings accounts.

Under current law, benefit payments from the Illinois 529 prepaid and savings programs *are not* added as income subject to Illinois state income tax, but distributions from out-of-state Section 529 programs *are* treated as income and are subject to Illinois Income Tax.

The bill provides that these out-of-state programs only receive this state tax exemption if they comply with national ethical marketing and disclosure requirements that have been established. The bill is a compromise that has been developed over several years and is intended to resolve the Illinois tax treatment of these out-of-state programs in perpetuity.

HJR 32 – A recent report by the National Council of State Legislatures found that state higher education policymakers often lack reliable information about current and future students. In states with large urban areas or growing immigrant populations, the need for fresh data is even more urgent. And since more "independent students" - those who are at least 24 years old, perhaps married, working or veterans - return to school, the NCSL also urges legislators "not to neglect adult learners".

With these goals in mind, HJR 32 authorizes ISAC to enlist IBHE, Federation of Independent Illinois Colleges and Universities (FIICU), Women Employed, other advocates, demographers and others to take a comprehensive look at the "changing profile of Illinois college students" and the "degree to which they are served by MAP", and report back to the General Assembly by December 31, 2007.

Finally, there have been several bills introduced this session to promote awardees of the Illinois State Scholars program and other "high performance" students. We are working with these sponsors to craft an innovative grant program to help keep Illinois' "best and brightest" here in Illinois. Details will be forthcoming.

FY2007 MAP / Silas Purnell IIA / MAP Plus Status

As of March 16, 2007 143,535 students had been paid \$347.8 million in Monetary Award Program (MAP) awards. The Commission suspended award announcements for applications received on or after August 26, 2006. Currently 30,384 eligible applicants are in suspension status. No release of suspended applications is planned.

The Silas Purnell Illinois Incentive for Access (IIA) Program, funded for FY2007 at \$8.2 million, provides \$500 awards to zero-EFC students who applied prior to August 19, 2006. As of March 16 20,159 students had received awards totaling nearly \$7.7 million, and it appears the appropriation will be fully used. Awards for another 13,318 eligible students have been suspended.

MAP Plus is a new program that provides \$500 awards to sophomores, juniors, and seniors who do not receive MAP but have family incomes less than \$200,000. As of March 16, 54,097 students had been paid \$23.8 million through MAP Plus. 72,990 students who completed a FAFSA prior to the September 19, 2006 suspension date are eligible for MAP Plus; another 9,776 students have applications in suspended status.
