Pay It Forward Legislation

According to the HECC, if the Oregon Opportunity Initiative is passed during the November elections, the Treasurer’s office will be allowed to issue bonds for non-capital requests. This could be used, in whole or in part, to fund the PIF pilot.

The program fund would consist of:

• Funds received from the natural gas severance tax (established by this legislation):
  - $5 from every unconventional gas well in the state
  - Payments made by participants;
  - Any interest earned on the fund;
  - Any other funds appropriated or made available to the fund.

• PHEAA must report the financial stability of the program to the General Assembly three years after the first award is made, and every three years thereafter.
  - PHEAA would make recommendations to either increase or decrease the rate of the natural gas severance tax based on the sufficiency of program funding.

The report would identify an immediate funding source for the first 15-20 years of the pilot, as well as a method for collecting payments. Additionally, it includes a revolving fund to deposit payments made by participants.
