## ACCESSING THE ISAC FILE TRANSFER SYSTEM

The ISAC File Transfer System is accessible using a web browser and navigating to the URL **https://transfer.isac.org/**. Please note that the site uses **HTTPS** and not HTTP. The web browser must have cookies and javascript enabled and it must allow popups for **transfer.isac.org** in order to function correctly.

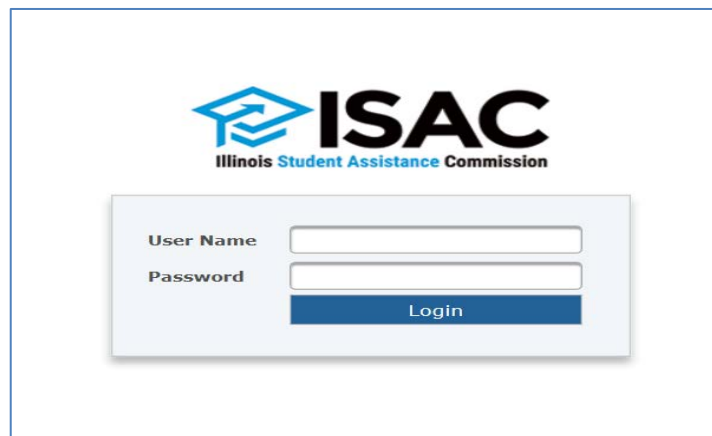

When logging on to the new ISAC File Transfer System site, all users will use their current GAP Access ID and password.

As a reminder, there is a five-minute inactivity timeout. This means that while you are logged on, if you do not do anything for five or more minutes, you will be prompted to logon again.

## LOGGING IN TO THE ISAC FILE TRANSFER SYSTEM

Once you navigate with a web browser to **https://transfer.isac.org/**, you should see a page that looks like the screen below. Enter your GAP Access username and password.

## SCHOOL FOLDER

# ISAC FILE TRANSFER SYSTEM

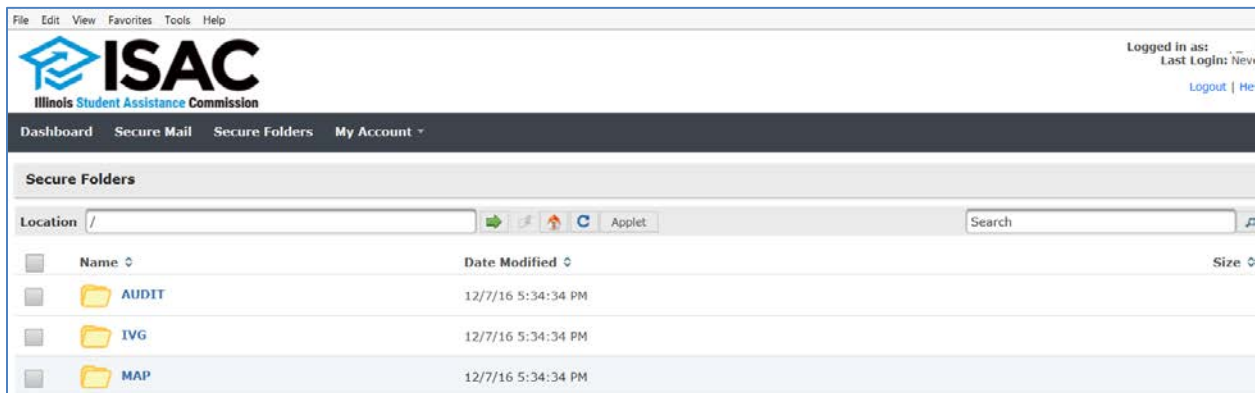

After a successful login, you will go to the Secure Folders screen (see below). This screen should display your **School Folder** on the ISAC File Transfer System, identified by your institution's 6-digit US Department of Education school code.

**Note: You should not use the Back and Forward buttons of your web browser to navigate as this will result in unintended consequences.**

## PROGRAM FOLDERS

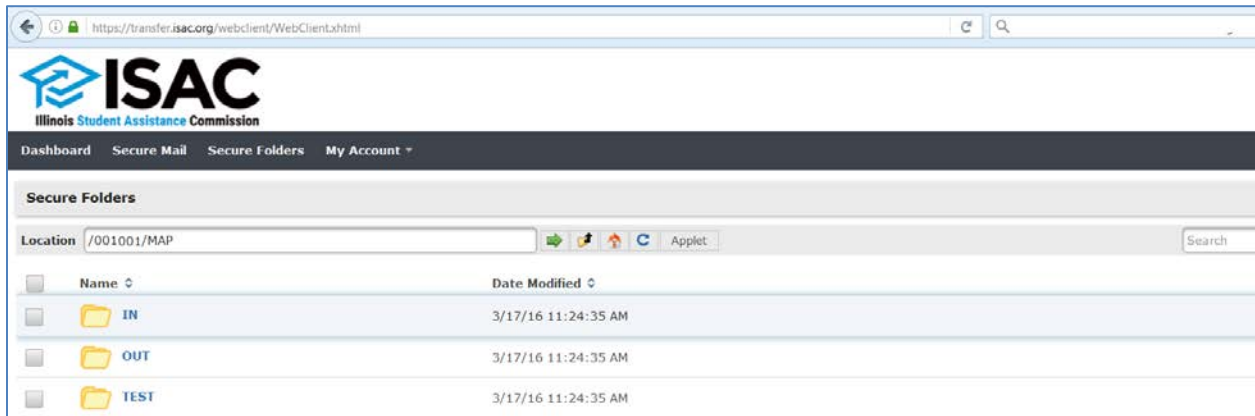

Click on the School Folder, and next you will see **Program Folders** named similar to the ones below. Please note that you will only see the IVG and ING related folders if your institution is participating in the exchange of files for those programs.

## PROGRAM SUBFOLDERS

Each Program Folder will have an IN, OUT and TEST subfolder. The IN subfolders are to be used when an institution needs to transfer a *file* to ISAC. You will not be able to transfer folders to the ISAC File Transfer System, file only. The OUT subfolders are to be used to retrieve files that ISAC has made available to an institution. The TEST subfolder allows the transfer of test files only.

The following provides an explanation for each program subfolder. See the screen on the following page.
